

**Garbage Collected Separately** ※The number of garbage collected separately is 15 per collection.

**Non-Burnable Garbage**

Please use designated garbage bags (100 yen each) for non-burnable garbage.  
Please do not fill the garbage bags with more than 10kg of garbage.

※Printed in orange on transparent bags.

Pieces of Glass Ceramics

Stationery, Toys

Pans, Kettles, Umbrellas, Etc.

- Please take proper safety measures, such as wrapping dangerous items like kitchen knives in paper and writing "danger" on them.
- Please do not put garbage in the bags that cannot be collected by the city. For details please check the **Garbage Not Collected by the City section.**

- Please tie the mouth of the bags tightly.

**Bulky Garbage**

Please place a handling ticket (possible to combine them) along with the necessary fee amount on each item when putting it out.

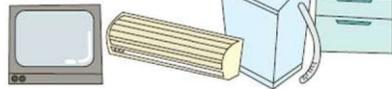

Home Appliances /  
Air-Conditioning Equipment /  
Audio Equipment /  
Furniture / Bedding /  
Fixtures / Hobbies /  
Entertainment Items  
Items that do not go in designated garbage bags, such as infants' and children's supplies.  
Items exceeding 10kg.

Batteries must be removed from electric bicycles before disposing of them. (As for how to dispose of the battery, please take out the battery with the mark of "rechargeable battery" in the hazardous garbage listed on the right side with hazardous garbage. For anything else, please contact your dealer or manufacturer.)

**Specific Household Appliance**

Air Conditioners (independent from your building)  
TVs (cathode ray tube types, liquid crystal types, plasma types)  
Refrigerators and Freezers /  
Washing Machines /  
Clothes Dryers

In principle, dealers will handle these items. Please contact

- Retailers where you made purchases in the past
- Dealers where you purchase replacement products
- If you are applying for a separate house collection, please note that such applications cannot be made online, so please apply via telephone.

**Hazardous Garbage**

Please put a handling ticket (100 yen) on each transparent or translucent bag of hazardous garbage up to 45 liters when putting it out.

Please separate the hazardous garbage into two types (other than mercury-used waste products and mercury-used waste products) and put them in separate bags.

**A:Waste products using mercury** (Item example)  
Fluorescent tube

Mercury thermometer · Mercury sphygmomanometer  
※A broken or a cracked ones are put in a bag where separate contents can be seen respectively, and are put together in a fluorescent tube and one bag.

**B:Other than waste products using mercury** (Item example)

Batteries, lighters,  
Button batteries  
(code symbols BR/CR only)

Rechargeable batteries Mobile batteries  
  
NiCad Nickel Lithium ion

Small household appliances less than 30cm that cannot remove rechargeable batteries.

 Waste aerosol products (various spray cans, cassette cylinder etc.)  
(Empty their contents completely and do not punch holes in them.)

- For coin-type batteries and small rechargeable batteries, cover the terminals with vinyl tape.

- For button batteries other than code symbols BR and CR, please consult your dealer.
- Up to 10kg in total when two bags are put out with A and B.
